

## Value-Added Expertise

Any well planned construction project begins with a quality subsurface investigation of the site. Our team of experienced drillers can quickly and safely obtain the correct data to streamline the entire design process.

By procuring accurate subsurface information, TransTech Drilling Services offer the value added expertise critical to the successful design and completion of your next project.

TransTech Drilling Services will implement a subsurface exploration program specific to your project. By clearly defining the scope of this activity, accurate information will be gathered in a precise and cost-efficient manner.

## Industry Standard Drilling Techniques Include:

- Hollow Stem Auger
- Mud/Air Rotary
- Shelby Tube Sampling
- Rock Coring
- Vane Shear Testing

## Going Wherever the Need Is

A variety of field data is obtained from borings, rock coring and standard penetration testing. TransTech Drilling Services operates rubber tire and rubber tracked all terrain drill rigs to access just about any location. These machines are dependable workhorses with application specific benefits.

The CME-75HST is mounted on a Marooka rubber tracked carrier. With a reputation of going where it shouldn't, this unique tread technology has been used to penetrate Antarctica as well as equatorial rain forests. The CME-75 is powerful and fast; retract rates of up to 90 feet per minute reduce cycle times.

## Our People Make the Difference

TransTech Drilling Services has a dedicated staff of expert drillers with over 25 years of combined experience in geotechnical and environmental drilling. They have completed assignments that include residential projects, small and large industrial facilities, office buildings, educational buildings, transmission line towers, underground pipelines, bridges and roadway reconstruction projects, cell towers, plus environmental remediation projects.

As a resource, TransTech Drilling Services are invaluable to your business. The depth and breadth of our prior project experience is an asset to any project.

## Benefits

- Proven industry expertise
- Difficult sites access with all-terrain vehicles
- Maintain schedule and project budget

Serving clients throughout New York, Pennsylvania, Vermont, Massachusetts, Connecticut and surrounding areas, TransTech Drilling Services are centrally located in Schenectady, New York.

## About the Company

TransTech Drilling Services is a division of TransTech Systems of Schenectady. Founded by the very talented and highly regarded Harry Apkarian, TransTech is one of the most qualified developers of high-tech instrumentation for the civil engineering field in the world. Under the direction of David Apkarian, TransTech Drilling offers top notch subsurface investigations for your civil and environmental projects.
