## About the Company

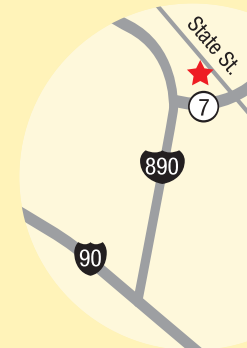

QCQA Labs is a division of TransTech Systems of Schenectady. Founded by the very talented and highly regarded Harry Apkarian, TransTech is one of the most qualified developers of high-tech instrumentation for the civil engineering field in the world.

Under the direction of David Apkarian, QCQA Labs offers a

wide range of both field and lab testing of construction materials for projects from highways and airport runways through bridges and tunnels to dams, power plants and other public, commercial and private structures.

QCQA Labs offers numerous testing options for asphalt, concrete and soils as well as various other engineering disciplines.

## Other Services

### Asphalt Testing

A current listing of QCQA's asphalt design, production and asphalt lay-down inspection services includes HMA density testing, core sample analysis, perpetual pavement design and mix verifications, segregation testing and a comprehensive NYS-

DOT quality assurance package plus HMA plant inspection.

### Soils Testing

QCQA also offers soils testing and inspection options that include in situ density, specific gravity, abrasion, soundness, moisture and grain size, moisture-density relationships plus organics and pH, among others.

### Concrete Testing

A wide range of concrete & masonry test and inspection offerings include mix design, compressive flexural strength, in situ strength testing, compressive strength testing as per ASTM C39 and many more.

## Engineering Services

- Investigative Engineering
- Wireless Telecommunications Facilities Site Review & Design
- Small Site Development Review & Design
- Municipal Approval Support
- Materials Research and Design
- Failure Analysis
- Product Testing
- Forensic Engineering
- Material Source Development
- Special Inspection

## General Services

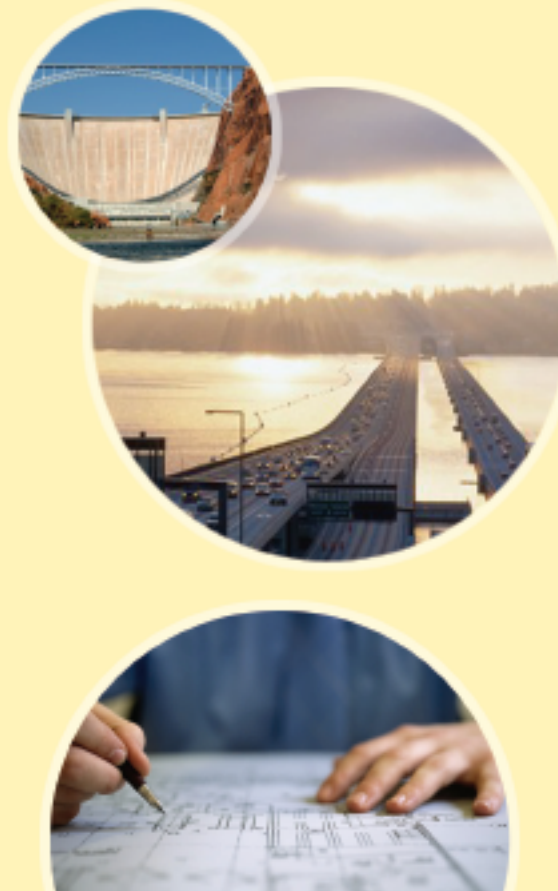

- Special Inspection
- Testing & Inspection Pre-Planning
- Storm Water Inspection
- QCQA Geologist
- Mobile Lab
- Sprayed Fireproofing

## Recent Projects

- Price Chopper Freezer Warehouse, Rotterdam, NY
- Federal Express Freight Terminal, Rotterdam, NY
- Church Street Parking Garage, Saratoga Springs, NY
- I-90 Resurfacing, Albany Exit 2 to Exit 5
- Proctor's Theatre, Schenectady, NY
- Fort's Ferry Power Substation, Latham, NY
- Niagara Mohawk, Broadway, Albany, NY

## Current Memberships

- New York Construction Materials Association
- New England Transportation Technician Certification Program
- New York State Concrete Masonry Association
- Northeast Subcontractors Association
- New York State Society of Professional Engineers
- American Concrete Institute – Eastern New York Chapter
- Associated General Contractors of America
- National Asphalt Pavement Association

QCQA Labs offers numerous mobile field and lab testing facilities and equipment for prompt and accurate analysis of all your civil engineering materials – for highways and airport runways through bridges and tunnels to other public, commercial and private structures.

QCQA's Engineering Services have been established to help you get your next civil engineering task done quickly, accurately and cost-effectively. With many years of experience in the host of engineering disciplines listed below combined with a talented staff of extremely creative people, QCQA is ready to help.

If you don't see what you need, please ask. We are adding new testing equipment and options every day.

 **Yes, please contact me to discuss engineering services by QCQA Laboratories, Inc.**
