

Google Chrome

1. Click the Chrome menu icon Chrome menu on the browser toolbar.
2. Select Settings.
3. On the "Settings" page, click the Show advanced settings... link.
4. In the "Privacy" section, click Content settings...
5. Select Allow all sites to run JavaScript (recommended) in the "JavaScript" section.
6. Click Done.

Internet Explorer

1. From the Tools menu, select Internet Options.
2. Click the Security tab.
3. Click the Custom Level button.
4. Check the radio buttons next to Enable Active Scripting and Scripting of Java applets.
5. Click OK to accept scripting changes and close the Security Settings window.
6. From the Internet Options dialog, click Apply to effect settings then OK to close the dialog.

Safari

1. In the Edit drop-down menu at the top of the window, select Preferences.
2. Select the Security icon/tab at the top on the window.
3. Check the enable JavaScript checkbox.
4. Close the dialog box to save your changes.
5. Refresh your browser.
